JT VORTEX 2 FAN

The Vortex 2 fan features a highspeed motor which extracts humid air from inside the goggle during game play.

Is fog always winning no matter where or when you play? The first step to a fog free game of paintball is a thermal lens for you goggle system. The Vortex fan is a close second! Designed to circulate air inside the mask this little fan combined with a thermal lens will prevent fog in Alaska at 10°F, 120% humidity, and panting from a 100yrd sprint. These fans are so powerful you can play with them turned off, then once you fog up, switch them on for 10-20 seconds and completely remove fog from you lens. If your fan is loud just add a few drops of paintball marker oil to the drive shaft and its back to stealth hunting! If fog is your enemy, step up your game!

23214 - JT Vortex 2 Fan / Black

FEATURES

- 2-way switch to either blow air in or draw air out
- Fits all JT Elite and Spectra Goggle systems
- Battery included
