SEBT-4 + COMBAT

Ever broken a paintball in your barrel? Of course you have, it happens to everyone. Just slide your squeegee down the barrel a couple of times and then start shooting again. Ever break a ball in the breach of your paintball marker? If so, that's a completely different situation. For most markers, that means a trip off the field to break down your gun and start cleaning. Not anymore. With the Empire BT4 Slice feature, remove the hopper and just pull one of the shell pins and open it up to get inside to clean. You can do it right there, on the field, while under air pressure.

No other marker gives faster access to the internals of your marker than the Empire BT4 Slice Combat paintball marker, also known as the BT4 Slice Combat paintball gun. This semi-auto baby has been made for years by Empire and has moved one step closer to the perfect paintball gun. Break it down in less than 15 seconds, give it a quick cleaning and be back fighting your opponents in less than 1 minute. Spend more time on the field and less time doing maintenance with the BT4 Slice Combat from Empire Battle Tested paintball.

MARKERS

The FT-50 utilizes the same design of the popular FT-12 with a flip top, tool-less design but with new internals and barrel for .50 Cal games. There are many advantages to .50 Cal games including a lower weight, less impact and less mess to clean. When the FT-50 is fully loaded with paint, the smaller hopper still carries over 300 paintballs but the overall weight is much lighter. It also provides a lower impact force that will appeal to younger players. The fliptop design makes rental maintenance easy and quick. Compared to .68 caliber paint, .50 caliber paint has lower cost, takes less storage space, and results in less paint to clean. All of these aspects of the FT-50 will ultimately contribute to the bottom line of a field.
