Ever broken a paintball in your barrel? Of course you have, it happens to everyone. Just slide your squeegee down the barrel a couple of times and then start shooting again. Ever break a ball in the breach of your paintball marker? If so, that's a completely different situation. For most markers, that means a trip off the field to break down your gun and start cleaning. Not anymore. With the Empire BT4 Slice feature, remove the hopper and just pull one of the shell pins and open it up to get inside to clean. You can do it right there, on the field, while under air pressure.

No other marker gives faster access to the internals of your marker than the Empire BT4 Slice Combat paintball marker, also known as the BT4 Slice Combat paintball gun. This semi-auto baby has been made for years by Empire and has moved one step closer to the perfect paintball gun. Break it down in less than 15 seconds, give it a quick cleaning and be back fighting your opponents in less than 1 minute. Spend more time on the field and less time doing maintenance with the BT4 Slice Combat from Empire Battle Tested paintball.
